Education:

1981 Master of Science, Geology
Eastern Kentucky University

1975 Bachelor of Arts, Geology
Georgia Southern College

Summary of Qualifications:

- Masters level education in geology.
- Over 28 years experience as a petroleum geologist.
- Extensive knowledge of the exploration process, from concept to completion.
- Owned, operated, and drilled on secondary recovery projects in eastern Oklahoma.

Employment:

2005-2009: Consultant Geologist, Oklahoma City, OK

Working as a consulting Geologist for various companies. Recent clients include Robson Energy in Edmond, Oklahoma and Crystal River Oil & Gas in Aspen, Colorado. Worked as prospecting geologist for Robson and as a consultant for Crystal River to enhance their existing production in Texas, Kansas and Oklahoma.

2002-2005: JMA Energy Inc., Oklahoma City, OK - Senior Geologist

Started with JMA on a contract basis in 2002 to map and delineate prospects in the Mayfield and Grimes areas of Roger Mills and Beckham

counties in Oklahoma. Started a salaried position in 2004 and continued various projects including extension of Prue and Cleveland sand plays in Dewey and Custer counties in Oklahoma. Also worked thrust-faulted areas in Washita and other counties.

1987-2002: Consultant Geologist, Oklahoma City, OK

Consulting work for several local clients and Corporation Commission work for out of state clients. Contract mud logging for several companies. Drilled on and operated two waterflood projects in eastern Oklahoma. Researched, bought leases, and sold various drilling deals in diverse areas of Oklahoma and Kansas.

1985-1987: Clifford Resources, Inc., Oklahoma City, OK – Geologist

Involved in many projects ranging from development of a Mississippi/Simpson Field on the Oklahoma-Kansas border to shallow gas well drilling in Pontotoc County. Continued infield development of an earlier prospect that was in Custer County.

1981-1985: DI Energy, Inc., Oklahoma City, OK – Geologist

Involved in a 250 well drilling program in the “deep” Anadarko Basin. Responsible for many field discoveries including the Butler Field in Custer County. Reserves in the Butler Field were in excess of 35-40 BCFG and 1.2 - 1.5 MMBO.
