

Triple Diamond Energy Announces Commencement of its Four Well Program in Oklahoma's Hoover Field

ADDISON, TX – March 1, 2008 - Triple Diamond Energy Corp. (<http://www.triplediamondenergy.com>) reported today that the Oklahoma Corporation Commission has issued its permit to drill the McClure Diamond #1 well, the first well in its Garvin County, Oklahoma program. This four well step-out drilling program is located at a southeastern extension of the Hoover field.

The construction of the well site is nearing completion in anticipation of an imminent spud date. Mud-logging and additional geological services have been engaged. TDEC has entered into an operating agreement with Explo Oil, Inc. whereby Explo will perform services with respect to drilling, testing and completion of the prospect wells.

Oklahoma ranks fifth in the nation in crude oil production (behind Texas, Alaska, California and Louisiana) and is second in natural gas production (behind Texas). The state produces 3.3 percent of the nation's crude and 8.8 percent of the natural gas in the U.S.

About Triple Diamond Energy Corporation: Triple Diamond Energy Corp. (<http://www.triplediamondenergy.com>) is a private corporation that was formed as an independent producer of oil and natural gas and is located in Dallas, Texas. The management team at Triple Diamond Energy Corporation has over 35 years combined experience in the successful operation of profitable business entities, including the oil and gas industries.
